Corporations are continuously facing external and internal threats to their communications and confidential information. Due to the rapid growth in existing and emerging technologies the challenge to protect information from various forms of corporate espionage is increasingly difficult.

Exec Security specializes in Technical Surveillance Countermeasures (TSCM), often referred to as eavesdropping detection or debugging sweeps. TSCM is the practice of detecting, uncovering, and preventing eavesdropping threats and unauthorized surveillance. As TSCM specialists we have a thorough understanding of the many vulnerabilities that exist in technology and corporate infrastructure.

**Why should my company be worried about industrial and corporate espionage?**

- Corporate spies are hard at work every day trying to find ways to steal profit out of your company.
- Information about company decisions can be worth millions or even billions of dollars when put in the wrong hands.
- Stock value can be seriously damaged if information is revealed at the wrong time.
- Legal battles can be lost if confidential knowledge is exposed.
- Acquisitions and mergers can fail due to leaked information.
- Employees can destroy a company’s reputation by disclosing private information.
- Executives can be put in physical danger if private plans or agendas are revealed.
- Proprietary information must receive protection in order to be classified as trade secrets.

**What are the threats?**

- Listening devices can easily be planted in offices and boardrooms.
- Microphones could be hidden in walls or ceilings.
- Covert video cameras could be installed in conference rooms, design labs, or other private areas.
- Rogue wireless access points can tap into your data network.
- Telephone lines can be intercepted.
- Phone and voicemail systems can be exploited.
- Executive residences can become a target.
- Vehicles may be tracked or bugged.
- Private aircrafts and yachts are also at risk.
- Hotels and conference venues can be compromised.

**How can Exec Security help you?**

- We are equipped with the lastest technology for detecting and locating hidden transmitters, listening devices, covert video, and any type of eavesdropping device.
- We constantly review new and emerging threats, study new technology, and regularly receive advanced training to counter these threats.
- We are experienced in all types of communication technology and will not compromise your networks or telecom systems during our inspections.
- We are experienced working in high profile environments, executive suites, and residences.
- We understand corporate security needs and responsibilities, and the seriousness of what is at risk.
